Fort Lauderdale Conference

Broward County Convention Center

About Social Thinking

Our mission is to help people develop social competencies to better connect with others and live happier, more meaningful lives. We do this by creating concepts, curricula, and materials that serve two purposes:

1. To break down and organize abstract social concepts to educate professionals and family members on how to teach social competencies.
2. To help individuals age 4 through adulthood improve their social competencies to meet their personal, academic, and professional goals. Along the way, we teach how to share space effectively, work as part of a team, and develop relationships—with family, friends, classmates, coworkers, romantic partners, etc.

Who We Help

While our deeper work is for individuals age 4+ with solid learning and language skills (Asperger's syndrome, ASD levels 1 & 2, ADHD, and other social communication challenges), a subset of our work is being adopted into mainstream classrooms and workplaces around the world to improve social-emotional competencies for all.

Who Should Attend?

In short—anyone who wants to help those with solid learning and language skills improve social competencies: speech-language pathologists, special and general education teachers, social workers, counselors, school and clinical psychologists, family members and caregivers, occupational therapists, behavior specialists, and school administrators, to name a few.

The Social Thinking Methodology builds:

- social competencies
- social self-awareness
- perspective taking
- self-regulation
- executive functioning
- social skills
- social-emotional understanding
- organizational systems
- reading comprehension of literature
- written expression, and more...

Implementing Social Thinking Concepts and Vocabulary: A Day to Develop Team Creativity | ages 5 - young adult

Kari Zweber Palmer

Learn more than 20 Social Thinking strategies and three core treatment frameworks to guide individuals to better attend, interpret, problem solve, and respond to social information. Help individuals 1) observe and respond to situations based on the context and determine the “expected” behaviors of each situation, 2) learn core Social Thinking Vocabulary and concepts to encourage social-communicative competence, and 3) discover strategies for teaching self-regulation, executive functioning, emotional understanding, and theory of mind/perspective taking. Work in teams to develop lesson plans to implement new strategies in the home, clinic, or classroom the very next day. People love this hands-on, engaging course!
