Social Thinking Livestream & On Demand Courses

Who Should Attend?
Speech language pathologists, special and general education teachers, social workers, counselors, school and clinical psychologists, family members and caregivers, occupational therapists, behavior specialists, school administrators, and anyone else interested in learning how to help those with social learning differences and/or challenges.

Our Livestream and On Demand courses give you the opportunity to learn about a wide array of topics for all ages. Now it is easier and more affordable than ever to learn about self-regulation, executive functions, the social-academic connection, social metacognition, and more when you want, and no matter where you are. Our excellent speakers provide practical strategies, tools, and information from their vast teaching experience, strong knowledge of the research and decades of working with social learners (e.g. ADHD, language learning challenges, twice exceptional, Autism Spectrum levels 1 & 2). You’ll learn from practicing clinicians who are the creators of the Social Thinking® Methodology and their colleagues. All speakers make it a point to incorporate timely insights, relevant research and humor into all of their presentations.
