Social Thinking's free webinar series

How to Use Social Thinking Materials to Teach Grades 3-5

People frequently ask how our products can be used together for a specific age group to teach and motivate kids to improve their social competencies in a fun and engaging manner. In Social Thinking's first ever webinar, Michelle Garcia Winner will discuss the products Social Thinking has created for students in grades 3-5 (8-11 year olds) as well as share teaching tips and strategies related to the use of the following materials: *You are a Social Detective!*, the *Superflex™* Curriculum, *Social Thinking and Me*, and the game *Should I or Shouldn't I?*. Michelle will present for the first 30 minutes, and in the last 30 minutes she will answer the questions you submit live. Learn information you won't get at a conference!

- 60 minutes of instruction
- Original webinar took place Dec 8, 2016, recording is available to be watched at any time

Person in Attendance:

A handwritten signature in black ink, appearing to read "Heidi Winner", written over a horizontal line.
