Social Thinking Webinar

Expected & Unexpected Behavior: #6 in Our Series of 10 Core Concepts

Social expectations become more complex with age. In this webinar, Michelle Garcia Winner explored the hidden expectations that surround us whether we are 4 years old or 40! She reviewed the dos and don'ts for using our popular terms "expected behavior" and "unexpected behavior" to best support students, clients, and children. Strategies were shared to help individuals figure out what's expected by building awareness of situations, people, and social context—and identifying what *they* expect from others. Michelle reviewed the Social Thinking materials that help you teach this powerful concept across different age groups.

- 90 minutes, or 1.5 contact hours, of instruction
- Original webinar took place Jan. 23, 2019; the recording is available to be watched any time at www.socialthinking.com/webinars
